LONG DISTANCE SERVICE

Station-to-Station Calls (From One Telephone to Another)

A station-to-station call is one on which you are willing to talk to anyone who answers the called telephone.

The charge for a station-to-station call begins when the called telephone or private switchboard answers.

This kind of call, which most customers prefer, is usually completed faster than person-to-person calls—and costs you considerably less.

To place a station-to-station call dial "0" (Operator), then give the operator who answers the following information—

- First — The name of the distant place.
- Second—The telephone number wanted (if known), otherwise the name and address of the telephone wanted. For example: Anyone at John Doe's residence, 425 Main Street.
- Third — Your own number when the operator calls for it.

Person-to-Person Calls (From One Person to Another)

A person-to-person call is one on which you want to talk with a particular person; or with a particular department reached through a private switchboard; or with a hotel room.

The charge is higher than a station call. Timing of the call begins when you are connected with the person or extension you called.

In placing a person-to-person call, it is necessary for you to give the long distance operator the name of the person or department you wish to reach. Otherwise, you place the call in the same manner as a station call.

COLLECT CALLS

If the charges on the call you are placing are to be paid at the distant telephone, tell the operator that it is a "collect" call. The charges, if accepted at the distant telephone, will be billed to that telephone. There is a 10c charge on all collect station-to-station calls made within the state.

Dial Service Suggestions

HOW TO DIAL

Suppose You Want To Dial Osborne OS 5-9170

1. Remove receiver and listen for dial tone—a "hum-m-m-ing" sound.
2. Place finger in opening where you see the letter "0."
3. Pull dial around until finger strikes the finger stop. Remove finger from opening and let dial return to normal. Do not force dial as it returns to normal position.
4. Proceed in the same way to dial the letter "S" then the figures 5, 9, 1, 7, 0, in the order in which they appear.

Either the ringing or the busy signal should be heard soon after the dialing is completed. The ringing signal is an intermittent "burr-burr-ring" sound that indicates the called telephone is being rung. The busy signal is a fast "buzz-buzz-buzz" which indicates the called line is busy.

If you make a mistake in dialing, replace the receiver momentarily—pick it up and dial the complete number again. Don't hurry—take time to dial correctly.

Always listen for and hear the dial tone before starting to dial.

TO CALL A PARTY ON YOUR OWN PARTY LINE

Take down receiver and listen for dial tone. Then dial "119" and then also dial the last 5 numbers of the party you wish to call, such as 5-9170. Hang up the receiver and after waiting a reasonable time, remove receiver and proceed with conversation.

HOW TO AVOID WRONG NUMBERS

If you are not sure of the number you wish to call, please look in the directory. Make a list of frequently-called numbers and keep it up to date. Depend on your memory only for those numbers called regularly and of which you are certain. Make a note of numbers furnished by "Information" on the page facing the inside back cover of this directory, or in "The Blue Book of Telephone Numbers" which you may obtain without charge or obligation by calling or visiting our Business Office.
