Why Be More Extravagant

in dress than your better dressed and more economical neighbor?

When you buy a garment and let small snags become large holes.

When you allow it to become filthy, making it more susceptible to wear, moth and death dealing germs, at the same time giving you that ungainly appearance.

Then that is extravagance.

While on the other hand the neighbor has these small holes attended to.

He keeps his clothes cleaned and pressed, free from dirt and germs, "increasing the wear of the garment many months" and retaining that presentable appearance which gives one that individuality that all self-respecting men desire.

That is economy.

You can acquire that individuality and practice economy at the same time by having

WIMER The Clothes Specialist

make those old clothes look like new.
Men's and women's garments cleaned by practical men.
Specialists on any kind of repairs or alterations.

Success and Failure

Success

The progressive, optimistic business man believes in making the most of unsettled conditions—getting all the business he can and laying broad foundations for the extension of his business when times are more prosperous.

He will not only weather the storm but he will retain the advantageous position in business that he has acquired through years of painstaking effort.

BELL LONG DISTANCE SERVICE

Failure

The unprogressive, pessimistic business man fails to make the most of his resources during unsettled times—naturally losing a share of his business to his more progressive competitor.

If he is fortunate enough to weather the storm at all, he will come through it deprived of many of the advantages that he had acquired during many years of effort.

The one is quick to see the value of a systematic use of

Bell Long Distance Service

in maintaining and strengthening his business relations during such unsettled times; the other sees in it only an added expense to be avoided. The use of

Bell Long Distance Service

may in your case be the dividing line between Success and Failure.

Information About Telephone Service

THE Telephone Company desires to render the best telephone service possible; the telephone patron desires to receive the best telephone service possible. One of the most important factors of good service is a better and wider knowledge on the part of our subscribers and patrons of the best method of using the service. The data on this and following pages contains valuable information and suggestions, a study of which will help you to use your telephone more efficiently.

How to Use the Service

Use the Directory of Latest Issue to avoid wrong numbers. Trying to remember numbers often results in mistakes and delays.

Spell Out All Numbers, one figure at a time. For Main 1375, say "Main—one—three—seven—five."

Speak Distinctly in a moderate tone of voice directly into the transmitter with the lips close to the mouthpiece.

Answer Your Bell Promptly. Don't make your patrons and friends wait unnecessarily.

While the Bell Is Ringing do not remove the receiver from the hook; it may interfere with the signals.

To Recall the Operator, move the hook slowly and continuously up and down. Rapid motions will not operate the signals.

Be Brief but Courteous to the operators. They have no time to converse.

Call "New Number Clerk" for names not listed.

Call "Chief Operator" to report unsatisfactory handling of your calls.

Call "Repair Department" when your telephone is out of order.

Visit Our Plant and see it in operation. Visitors are welcome at any of our Exchanges any week day between 9 a. m. and 5 p. m. A card of admission will be furnished in the office of the Manager.

Long Distance Service

To Make a Long Distance Call—Call the Local Operator in the regular way and ask for "Long Distance." When the Long Distance Operator answers, give her the Telephone Number from which the call is being made and the name of the person making the call. Then give the name of the firm or person wanted, the city or town and state. If the number of the telephone desired is known it should also be given. If the number of the telephone desired is not known, give the firm name or the name and initials of the person under whose name the telephone is listed, and, if possible, the street address.

Messenger Calls.—If the person desired is not connected by telephone, a messenger will be sent to his address to request him to come to a telephone, provided the party calling guarantees payment for the messenger service. The exact amount disbursed for messenger service will be charged in addition to the Company's tariff rates.

Appointment Calls.—Appointment to talk at a specified time may be made by notifying the Long Distance Operator of the time at which the connection is desired. No extra charge will be made for appointment calls (except for Messenger Service when such service is involved), but the Company cannot guarantee the completion of the connection at the exact time specified.

Collect Calls.—The charges on a Long Distance call, including Messenger charges, if any, may be made against the telephone called, provided the charges are accepted by the party called. Requests to have the charges collected from the telephone called should be made when the call is given to the Long Distance Operator.

Leave Word Calls.—If the person with whom you wish to talk is not immediately reached at the telephone called, word may be left (without charge) to have him call when ready to talk.

Reports.—In case delay is encountered in completing a call, the Long Distance Operator will advise the persons calling, at reasonable intervals, regarding the cause of the delay. If a report is desired, call the Long Distance Operator and ask her for the information desired.

Rates and Charges.—Rates for Long Distance service are based upon an initial period of three minutes; and the three-minute rate will be charged for connection not exceeding three minutes. For overtime, beyond the initial

Long Distance Service—Continued

period of three minutes, charge will be made by the minute for each additional minute or fractional part thereof. The Long Distance Operator will not interrupt conversation to notify subscribers of the expiration of the first three minutes.

When a particular person is asked for, every reasonable effort will be made to establish the connection with the person desired. If the person desired is not reached, no charge will be made for the service rendered, except for Messenger Service, should such service be involved.

When no particular person is asked for at the time the call is given to the Long Distance Operator, charge will be made if connection with the proper telephone is established.

Requests for Charges.—If a patron desires notification of the amount of the charge on his message, he will save time by so advising the Operator at the time he gives his call. If the request for such information is not made until the completion of the conversation, unavoidable delay results while the Operator obtains the rate and computes the charge.

Supervision by Private Branch Exchange Operators.—The Long Distance Operator is responsible for the supervision and timing of messages, and for this she depends primarily upon signals, which, on calls from Private Branch Exchanges, are controlled by the Private Branch Exchange Operators.

It is, therefore, essential that Private Branch Exchange Operators watch their signals closely and disconnect promptly at the end of conversation.

They should not, however, remain cut in on the line while conversation is going on, as by so doing they interfere with the service.

For information not given above, concerning Long Distance Service and to report complaints of Long Distance Service, call "Chief Toll Operator."

General Information

Directory.—The Telephone Company assumes no liability whatever for damages arising from errors or omissions in the making up or printing of this book. The utmost care is used, however, in listing all subscribers correctly.

Moves.—If you desire your telephone moved, please call at the Contract Department and sign a contract for your new location. The telephone will be moved on or as near the date designated as possible, providing ten days' advance notice is given.

Names of Non-Subscribers.—Residents of hotels, apartment houses, or residences, or employes of business offices, who are not subscribers to telephone service, may, with the consent of the telephone subscriber, have their name listed in the Telephone Directory. A moderate charge is made for such extra listings.

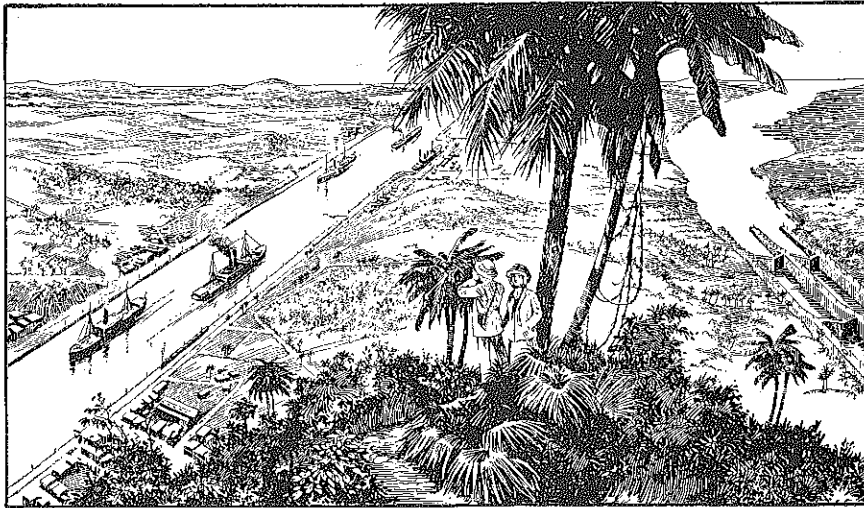

Telephone Attachments.—Telephone instruments have been designed to produce the best results obtainable, and are, necessarily, very sensitive and intricate. The various devices offered for sale and which are claimed to improve transmission, eliminate noise, destroy germs, supplant the Telephone Directory, etc., are unnecessary. Many of them get the telephone lines and instruments into trouble and the Company, to protect the service, is compelled to remove them.

Subscribers' contracts provide that no instrument or appliances not furnished by the Company shall be attached to or used in connection with its instruments or lines.

Telephone Numbers.—All telephone numbers are the property of the Telephone Company. Inasmuch as it is sometimes necessary to change subscribers' numbers, the Company reserves the right of cancelling or changing at any time any number. Patrons are advised therefore not to place their telephone numbers on letterheads, cards or wagons. The words "Bell Telephone" will answer all purposes and may save you considerable annoyance and expense.

Directory Advertising.—This Company has opened limited space in its Directories to clean and legitimate advertising. The rates are very reasonable when the enormously large circulation and the class of circulation of these Directories is considered. For information as to space and rates call "Manager's Office."

Profane and Obscene Language is against the law and will not be tolerated over the lines of this Company, and this Company reserves the right to remove, without notice, the telephone of any subscriber violating this rule.

The Price of Progress

THE Panama Canal stands as one of the most marvelous achievements of the age. Into its construction went not only the highest engineering skill, but the best business brains of the nation, backed by hundreds of millions of dollars.

Suppose conditions not to be foreseen made it necessary to replace the present canal with a new and larger waterway of the sea-level type, to be built in the next ten years.

Also suppose that this new canal would be the means of a great saving in time and money to the canal-using public, because of the rapid progress in canal engineering.

This sounds improbable; yet it illustrates exactly what has happened in the development of the telephone, and what certainly will happen again.

Increasing demands upon the

telephone system, calling for more extended and better service, forced removal of every part of the plant not equal to these demands. Switchboards, cables, wires and the telephone instrument itself were changed time and again, as fast as the advancing art of the telephone could improve them.

It was practical to do all this because it greatly increased the capacity of the plant, reduced service rates and added subscribers by the hundred thousand.

In ten years the telephone plant of the Bell System has been rebuilt and renewed, piece by piece, at an expense exceeding the cost of the Canal.

Thus the Bell System is kept at the highest point of efficiency, always abreast with the telephone requirements of the public. And the usefulness of the telephone has been extended to all the people.

CENTRAL UNION TELEPHONE COMPANY

“Working, Not Waiting, Brings Business”

“The best method I know for getting the most out of my working time is to keep busy at my telephone,” said a successful salesman recently.

“I don’t WAIT for orders, I WORK for them. I use the telephone because it helps me to reach more people and to get more business quickly than I could by any other method.”

This suggestion may help YOU to get more business. Don’t WAIT for orders—WORK for them—by telephone.

A Big Saving Factor in Office and Home

In your office the extension telephone will save time. In your home it will save countless steps.

The Extension Set is Worth Many Times Its Cost

LET US FIT YOUR TELEPHONE SERVICE TO YOUR BUSINESS

BELL RINGS—FRIEND WAITING—ANSWER PROMPTLY

THE NATIONAL REAL ESTATE BROKER

Exchanges of large properties throughout the entire globe a specialty. My original system affords exchanges upon basis of adaptability. What have you feasible to offer? I have constant demand for money on first mortgage gilt edge real estate. No form of security as good and gives you as full control over your investment as first mortgage security. I exercise proper judgment in creating my deals which makes them easy to close. **I am financially responsible, fair and honorable in all my dealings.** If my services are required be explicit in first letter. Reference, any bank or business man of our city.

Action!

That's what most of the people who deal with you appreciate.

That's what sends them to you in the first place with orders that might have gone to your less wide-awake competitors.

That's what brings them back with more orders.

That's what keeps your business building up and increasing in favor with that large and profitable group of customers to whom good goods, coupled with prompt attention to their needs, are the determining factors as to where they shall buy.

There is no more effective way to get "QUICK ACTION" than to make liberal use of the telephone

Economy

Is the watchword of the day. During periods of business depression, more than at any other time, the importance of eliminating unnecessary or unproductive items of expense receives first attention.

The telephone today has a more prominent place in the business world than ever before. It is no longer considered an expense but a necessity and a real economy — an investment that yields large returns. Does not good business judgment indicate that you are overlooking attractive possibilities if you fail to get the maximum results from your telephone service? The salesman you are thinking of dismissing because of lack of business cannot only be made of value to you in maintaining your sales organization intact for better times, but he can get actual immediate results by a careful systematic use of the

Bell Local and Long Distance Lines

There is a convincing element in the carefully planned "long distance" conversation that is often lacking in the personal call.

Traveling by Bell Long Distance Lines is economical and it gets results. They reach all points.
